SUMMARY

Senior Product Manager with **10 years of experience** building enterprise SaaS platforms across **operations automation, B2B logistics, and global marketplace technology**. At Akamai Technologies, owns vision and roadmap for three **partner-facing external platforms** serving global tech partners, ISPs, and logistics portal. Strong technical PM with a track record of **shipping AI-adjacent roadmaps, intelligent workflow automation, and data-driven operational products** that reduce operational overhead, improve reliability, and drive measurable revenue impact at scale.

EXPERIENCE

Senior Technical Product Manager — Akamai Technologies

Aug 2021 – Present

Akamai delivers 15–30% of all global web traffic. Powers and protects the digital experiences of the world's largest enterprises.

- **Led product vision and roadmap for three partner-facing external platforms** — Logistics Portal, Field Tech Portal, and Network Partner Portal — serving global tech partners, ISPs, and logistics vendors across Akamai's worldwide CDN and operations network.
- **Improved user satisfaction by 30%** and reduced support tickets by **40%+** through structured user research, iterative UX improvements, and workflow automation across all three platforms — directly improving partner operational efficiency.
- Launched new ISP and Field Tech platform versions end-to-end — partnering with engineering, UX, and operations across **multiple geographies**; delivered on time without quality compromise.
- Established quarterly planning and OKR-aligned prioritisation under the **SAFe framework**; led cross-functional delivery across engineering, UX, operations, and senior leadership on parallel high-impact initiatives.

Product Owner — Jiffyship (Freight Mango) — Cargo Technology Solutions

Mar 2020 – Jul 2021

B2B digital freight platform connecting shippers to international shipping value chain vendors across FCL, LCL, and air freight.

- Conceived and launched the **"Less Container Load" (LCL) feature** as a net-new strategic offering — identified an underserved SME shipper segment, designed the end-to-end product from concept to commercialisation, and brought it to market. **On track to contribute 30% of total annual business revenue.**
- **Designed intelligent workflow automation** for lead assignment using rule-based decisioning and real-time operational signals, reducing turnaround time by **70%** and improving lead-to-booking conversion by **10%**.
- Automated multi-stakeholder notification engine sending contextual updates to Shippers, Vendors, Sales, and Operations based on quote and booking lifecycle events — eliminating manual follow-up overhead.
- Built real-time customer engagement dashboard tracking inventory requests, conversion, and new signups, enabling ops team to respond **faster to pipeline signals**.
- **Improved User Activation by 10% and Engagement by 8%** through a full UI/UX revamp focused on learnability, memorability, and task efficiency.

Product Manager — Vinculum Solutions

Apr 2016 – Mar 2020

Global B2B SaaS — Order, Inventory, and Warehouse Management System (OMS/WMS/WCS) for enterprise and SME clients across SEA, Middle East, India, and US.

- Launched **20+ integrations** with global marketplaces, logistics carriers, web stores, fintech, and analytics partners — directly enabling market entry and revenue growth across **4 geographies: SEA, Middle East, India, and US**.
- **Increased overall MRR by 18%** by redesigning pricing strategy to include a monthly minimum commitment, improving revenue predictability for enterprise accounts.
- Launched one-click **Tally ERP 9 integration**, generating a **10–20% MRR increase per client** and becoming a key purchase driver for the India market.

- **Reduced page load time from ~10 seconds to ~2 seconds** and core workflow clicks by 40% through full UI/UX revamp, SQL query optimisation, and backend workflow redesign — significantly improving agent throughput.
- Collaborated with business leaders and engineering across cross-functional stakeholders to align and execute product roadmap, ensuring delivery timelines were consistently met.
